Summary

4th year Computer Engineering student inspired by continuously learning new technologies and improving my skills. I have built several projects using JavaScript, React.js, Solidity, Kotlin, and Java. Experienced in building UI designs using Figma and Adobe XD.

I worked as an intern in a well known company in Turkey, Imece Yatirim Organizasyon, for one month. I was learning JavaScript that time so, I built some projects with the help of the assistant. I built: Twitter Clone website, Shopping Store, Speed Type Master game, and and Elapsed Time Notification.

On my Research Project for the final year at school I worked with a team and we created an Android App using Kotlin, Retrofit, and Firebase, it was about displaying Food Recipes to the user from a ready API. I will improve it more and publish to Google Play Store in the future.

However, I learned digital marketing out of curiosity on how do companies get known and run ads. I landed a job at an agency, Aplus Partner, and handled several business accounts. Delivered over thousands of leads in a few months while continuing to improve my skills and ability to handle the CPR (Cost Per Result) to make it as low as possible.

I am now learning Solidity and React.js for blockchain development. I created a Web3.0 project using React.js and Solidity which helps the user connect their wallet and transfer Ethereum to another wallet address with the amount they like. And the transactions can be viewed from Etherscan and also displayed on the website.

Experience

Digital Marketing Specialist

A Plus Partner

Nov 2021 - Present (4 months +)

Computer Engineer

İMECE YATIRIM VE ORGANİZASYON A.Ş

Aug 2021 - Sep 2021 (2 months)
Learned more advanced JavaScript and built responsive websites: Shopping Store, Speed Typing Game and Elapsed Time Notification.

Marketing And Advertising Manager

Pharmaceris

Apr 2021 - Aug 2021 (5 months)
Managed to create several Ads for Pharmaceris to get more Posts Engagements, Page Likes and Traffic to its website.

Education

Doğuş University
Bachelor's degree, Computer Engineering
Sep 2018 - Jul 2022

Sunlight International School
2010 - 2018
